Heatmap showing the expression of 100 genes across 15 cell lines. The genes are listed on the right, and the cell lines are listed on the left. The heatmap is color-coded by SNV status: blue for SNV, red for SNV, and grey for SNV. The cell lines are grouped into three main categories: T1-COF-WES, T1-COF-WES, and T1-COF-WES. The genes are grouped into three main categories: T1-COF-WES, T1-COF-WES, and T1-COF-WES.

SNV Status

- ubiquitous
- shared
- private
- missing
- NA
